

Soshaul Logistics is here to provide low-cost back office services so your team can stay focused on high-priority tasks.

HOW TO QUICKLY PLUG-IN THE SOSHAUL LOGISTICS TEAM

1

You set us up as a vendor. We will provide W-9 and other documents for Accounting and Operations. We sign any NDA's that your organization requires.

2

You create users including emails and phone numbers, much like you would an intern. You provide limited system access and set any permissions necessary to allow users to complete essential back office tasks.

3

Your team assigns the tasks and our team completes the work remotely. We send you an invoice on a periodic basis (e.g., weekly, monthly) for the hours of work completed. Billed at a customary internship rate.

Working with Soshaul Logistics gives you and your company the opportunity to connect directly with our pool of motivated students. Partnering with Soshaul allows 3PL's to provide valuable remote learning opportunities for work-study students while simultaneously making an impact on education.

A FEW EXAMPLES...

Check Calls: Our team will perform track and trace services by completing check calls, updating load status in your system, and elevating any issues to your team.

POD Inquiries and Tracking: Our team will call carriers from a shared list provided by your Accounting team to investigate and request missing documents, such as POD or invoices, be sent to you directly.

Carrier Audits: Our team works from a shared list of carriers provided by your Operations team and we will update carrier records accordingly (insurance, equipment, safety, etc.)
